

Dear Student,

The Wollongong office of Andrew, a CommScope company is an R&D office with over 17 years experience in product development, mostly in software development. We are located in the ITC building on your campus. Andrew is currently recruiting permanent and fixed-term contract Software Engineers.

The Andrew office in Wollongong is a world leader in developing location infrastructure products for wireless and IP networks and this is a great opportunity to join our R&D team. If successful you will be creating leading edge telecommunication products. We develop in Java, typically on Solaris and use the latest tools such as Eclipse, OSGi and Hibernate. Our development process is second to none as these products require high availability.

General qualifications and skills required:

A graduate degree or equivalent in Computer Science or Engineering (telecommunications). An incompleting degree will also be considered, with:

- * Strong problem-solving ability
- * Strong communication skills
- * The ability to work effectively in a team
- * Familiarity with the software development lifecycle

Software engineers require object-oriented software development skills, preferably using Java and UML.

Experience in the following is an advantage:

- * Java 5 or 6
- * Eclipse
- * Hibernate
- * Ant
- * OSGi
- * Automated unit testing (e.g. JUnit)

If you are interested in applying for a position please email your resume with a cover letter (which addresses the skill set) and academic transcript to ansa-admin@andrew.com <<mailto:ansa@andrew.com>>.

Thank you for your time in regard to this letter and good luck in your career.

Yours sincerely

David Evans

R&D Director
