

Software Engineer

CEA Technologies is seeking capable and enthusiastic Software Engineers to participate in all phases of system development, from initial design through implementation and testing, and on to in-service support. We offer very competitive remuneration, a comprehensive package of employee benefits, the opportunity for continuing career advancement and a relaxed, safe and friendly work environment.

CEA is based in modern facilities in Canberra and designs, develops and manufactures advanced radar and communications systems. We are internationally recognised for our innovative research in these areas and our business has expanded rapidly in both domestic and export markets.

Our Software Engineers work on a variety of host and target platforms, in a broad range of areas including:

- Realtime control systems
- Embedded signal processing
- Networking
- GUI based command and control systems
- Simulation and modeling, and
- Large scale data analysis

Our primary development language is C++, but engineers with expertise in other languages are encouraged to apply.

Due to the mission critical nature of our systems, our primary goal is product quality. To achieve this goal we employ expert staff, and apply state of the art tools in a mature, process oriented and highly disciplined engineering environment.

You will need to have or be nearing completion of a degree in Computer Science, Software Engineering or a related discipline. Relevant experience in any of the areas listed above would also be advantageous. You must be an Australian citizen in order to qualify for a Defence security clearance.

If you are a Software Engineer with a focus on product quality, and you wish to advance your knowledge and your career by working on leading edge technology in a world class engineering environment then we would like to hear from you.

Further information regarding our organisation can be found on our website at www.cea.com.au.

Applications should be in writing and include a current resume and a transcript of your University results.
